## Wholesale Trade-List

... OF ...

# SOUTHWICK NURSERIES

### LOCATION.

I am situated on the line of the New Haven & Northampton division of the N. Y., N. H. & H. R. R., 5 miles south of Westfield, Mass., junction of the Boston & Albany R. R.; 100 miles west of Boston, and 100 miles north of New York.

Goods by express reach New York within five hours after shipment, and the cost of carriage to all points from here is comparatively light. Freight goes through to New York without change.

### TERMS.

Prices are in American money. Six at dozen rates, 50 at 100 rates, 500 at 1,000 rates. Packing at cost.

One dollar is equal in value to a trifle more than four English shillings, four German marks, or five francs.

All bills will be due upon receipt of goods, unless by special agreements. Unknown parties should give good references.

Remit by draft on New York, or by Post Office Order on Southwick, Mass. *Foreign Remittances by International Post Office Orders on Westfield, Mass.*

The packing season commences as soon as the plants can be got at in spring, about April 10, and lasts about six weeks, and in autumn as soon as the plants are ripe, mostly from September until December.

OFFICIAL CERTIFICATE NO. 3.

TO WHOM IT MAY CONCERN:

BOSTON, Aug 20, 1902.

THIS IS TO CERTIFY that I have this 20th day of August, 1902, completed the inspection of the nursery stock of Edward Gillett, grown at Southwick, State of Massachusetts, and find it to be apparently free from the San Jose Scale and other injurious insects and diseases which might be transferred on nursery stock from the nursery to the orchard or garden.

This certificate is good until July 1, 1903.

(Signed)      H. T. FERNALD, Inspector.

## Herbaceous Perennials.

For the most part in the following list of Hardy Herbaceous Perennials, I offer nursery-grown plants. Yet some of the North American Wild Flowers are collected in their native habitat; they are, as a rule, easily transplanted.

1 yr., means transplanted and grown in nursery one year. Coll., collected.

### "MIELLEZ'S REVELATION" IN LILY OF THE VALLEY.

It is of extraordinary size and vigor, of the most exquisite fragrance, and does well under all conditions and in all sorts of soils, growing just as well in full sun as partial shade. It is extremely hardy, and while not increasing quite as fast as the common kinds, is still of good increase. It is well to cover it in December with a good coat of barnyard manure—cow or horse—green is just as good as old. Leave it in the spring to serve as mulch. The Massachusetts Horticultural Society awarded it a "First-Class Certificate of Merit" on May 22, 1897. \$1 per dozen, \$5 per 100.

FERN BOWER AT THE GILLETT NURSERIES.

## FERNS.

The Ferns of New England are among the most charming of our *hardy perennials*. They are so easily grown that every park or yard may have them. If you wish to beautify a dark nook shut in by buildings or trees, where flowers will not thrive, try a few ferns and note the change. You can select from my list of about 40 kinds those suited for almost any situation that will sustain plant life.
